CAREER OBJECTIVE

I am Sumit Sahu, a passionate Full Stack Developer (MERN Stack learner) with a strong foundation in C++ programming and frontend web development. I am currently working with React.js to create dynamic UI components. I enjoy converting ideas into real-world projects and continuously improving my problem-solving skills. I am now preparing to move into backend development to become a complete full stack developer.

TRAINING / PRACTICAL LEARNING EXPERIENCE

Institute: Universal Informatics / Universal Institute, Indore

Program: MERN Stack (Full Stack Web Development)

Duration: June 2025 –Present

Responsibilities / Learning Outcomes

Learning frontend development using HTML, CSS, JavaScript, and React.js. Building responsive and interactive web applications with modern UI practices. Working on hands-on projects like Todo App, GitHub Profile Viewer, Image Finder, and Password Generator.

EDUCATION QUALIFICATION

Qualification	Institute / School	CGPA / %	Year
BCA	SRK University	7.5 CGPA	Pursuing 3rd year
12 th	Shri Anand H.S. School	84.50%	2022
10 th	Ideal public H.S. school	78.00%	2020

TECHNICAL QUALIFICATION

Technical skills: Programming Languages: C, C++

Front - End: HTML, CSS, JavaScript, React.js

Back - End: Node.js, Express.js

Database: MongoDB

Tools: Git, GitHub, VScode

PROJECTS

- **Portfolio:** Developed a Full-Stack Responsive Portfolio using React.js and Tailwind CSS for a modern, mobile-first UI with seamless Smooth Scrolling effects. Built a robust backend with Node.js and Express.js, integrated with MongoDB for secure data management and dynamic API handling, ensuring high performance and a fluid user experience across all devices. [Link](#)
- **GitHub Profile viewer:** web application uses the **GitHub API** to fetch and display user details such as avatar, bio, followers, following, repositories, with a “Visit Profile” button to redirect to the GitHub profile. [Live Demo](#)
- **Image Finder:** Built an **Image Finder web application** that fetches and displays images dynamically based on user search input using a **public image API**, with responsive and user-friendly UI. [Live Demo](#)
